Cetzal Ceme Bryan Emmanuel

Espinosa Mendoza Abraham

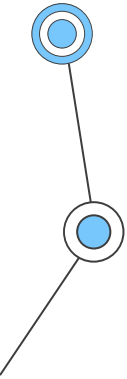

Garcia Cetina Daniel

# OBJECTIVE

Our project intends to facilitate the tasks load of CECATI No. 50 (State Office of Education). The management of the warehouse will become automated and an easy process through this software and will allow them to generate periodic reports of inputs and outputs.

# Users

## PRIMARY

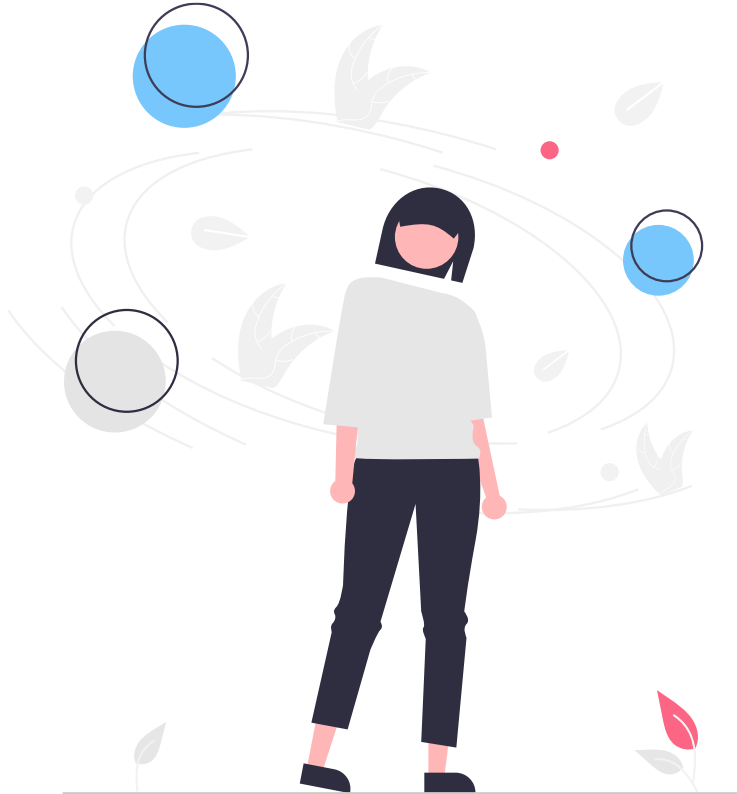

CECATI 50 Ciudad del Carmen,  
Campeche.

## POTENTIAL

CECATI's around the country

# Innovation

This project is made to help users improve the efficiency of tracking inventory and supplies

# REQUIREMENTS

# MAIN REQUIREMENTS

01

Generate good  
receipt notes

02

Generate a good  
balance sheet  
report

03

Generate stock lists  
per day

04

Generate a list of  
receipts and issues  
reports

05

Generate a stock lists  
per month

# MoSCoW

01

...

## MUST HAVE

All the requirements that are necessarily for the successful completion of the project

02

...

## SHOULD HAVE

Requierements that are important for the project completion but no necessarily

03

...

## COULD HAVE

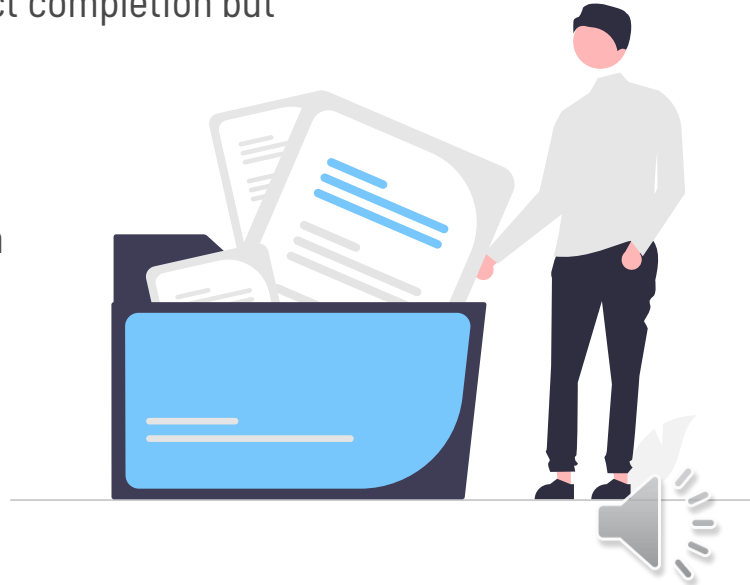

Requierements that are nice to have, but have a much smaller impact when left out the project

04

...

## WON'T HAVE

Have been recognized as not priority for the project's timeline

# Question guide

## MUST HAVE

Will the project work without this feature?

What happen if we launch the product without this feature?

## SHOULD HAVE

How much value does this feature add to the project?

Can this wait until the next release?

## COULD HAVE

How much value does this feature add to the project?

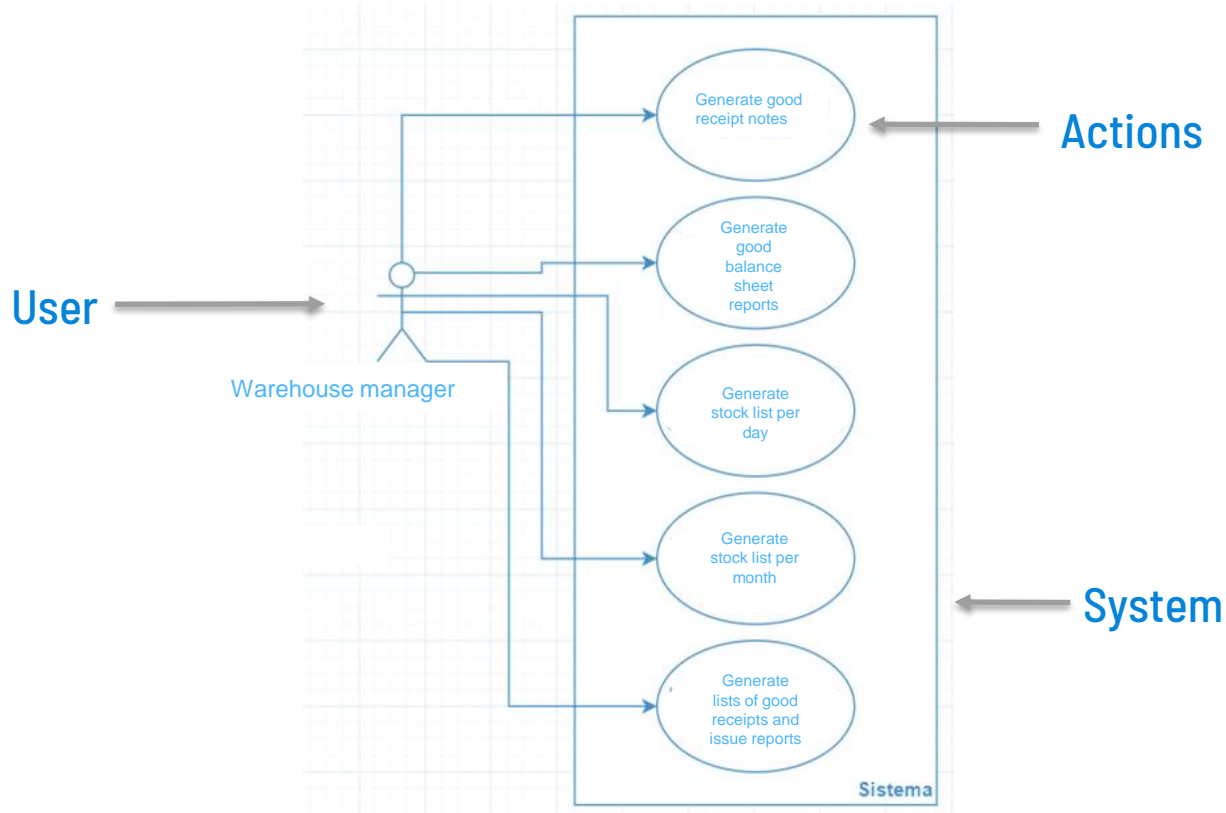

How much impact will this have on the project if it is left out?

## WILL NOT HAVE

Is this of little importance to the project at this time?

# Use Cases

# Development process SCRUM

# Roles team

## Product Owner

Product Owner is the voice of the customer

Abraham Espinosa  
Mendoza

## Scrum Master

Helps the Scrum team perform at their highest level

Adjany Armenta Aguilar

## Development Team

The development team decides how to accomplish the work set forth by the Product Owner

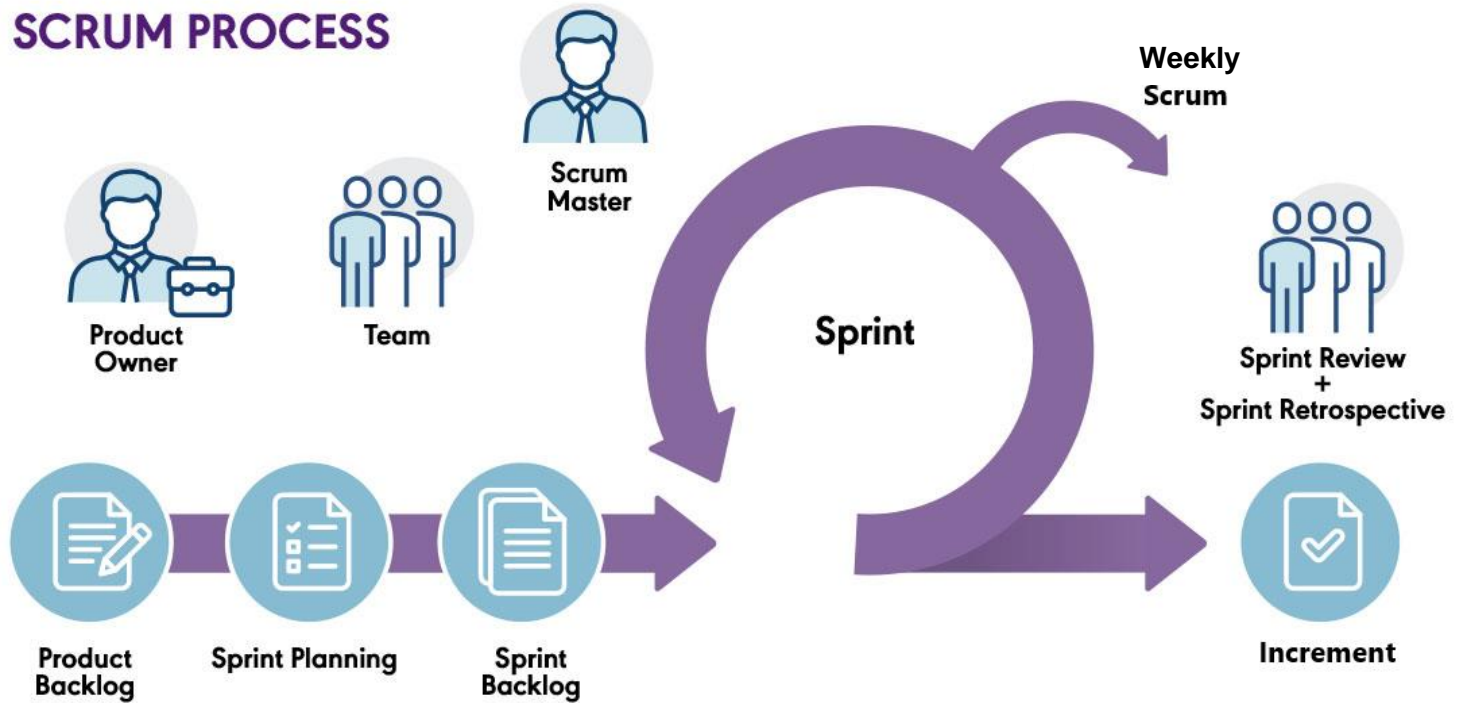

Daniel García Cetina

Libni Merari Castillo Vallejos

Bryan Emmanuel Cetzal Ceme

Ian Aguilar Ramirez

# SCRUM PROCESS

## Product Backlog

Assignment of functional and non-functional requirements

## Sprint Review

Job displayed for review

## Sprint planning

Selection of important feature

## Sprint Retrospective

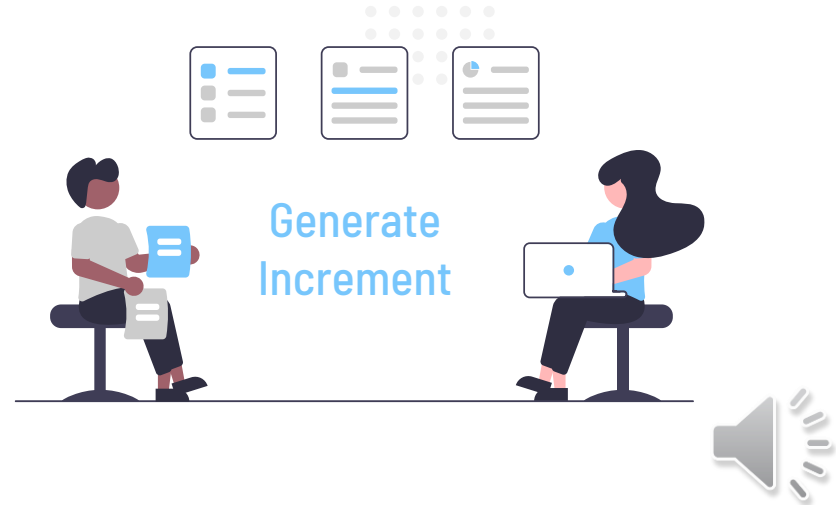

Agile process is evaluated

## Sprint Backlog

Assignment of each activity to the development team

## Meetings

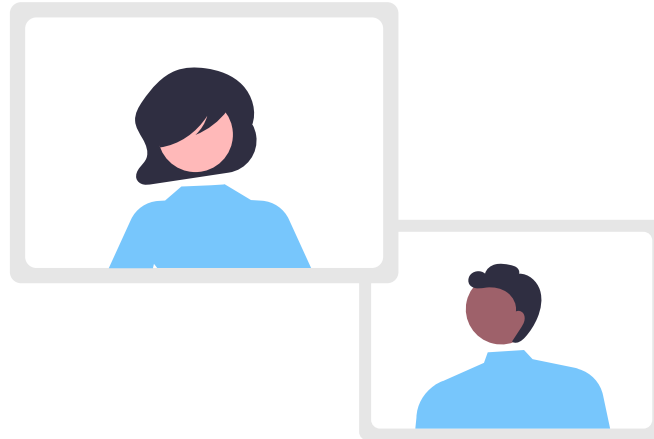

Weekly meeting

# Quality control

## Weekly Review

The purpose of the weekly reviews is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog as necessary

# Our Contribution Tracker

Contribution tracker - Manhattan - Sprint 1					
Accountables	Assigned activities		Team meetings attended and meetings with the mentor	Scale personal	Final grade
	Total	Complete			
Aguilar Ramirez Ian					
Armenta Aguilar Adjany					
Castillo Vallejos Libni Merari					
Cetzal Ceme Bryan Emmanuel					
Espinosa Mendoza Abraham					
Garcia Cetina Daniel					

Total meetings:

At the end of the sprint, each member is expected to contribute 16.67%

Calculus:  $((\text{Activities total} / \text{activities complete}) * 90\%) + ((\text{Team meetings attended} / \text{total meetings}) * 10\%)$

**Asunto: Definición de los requisitos**

El día 22 de septiembre de 2021 se ha llevado a cabo una reunión con el personal encargado del departamento de Recursos financieros y materiales en busca de definir los requisitos del software.

Se recogió un total de 6 requisitos principales y 12 secundarios.

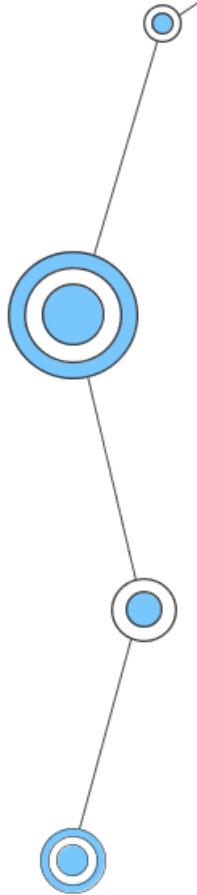

**Pendiente:**

- Ordenar los requisitos por prioridad.
- Clasificar los requisitos en:
  - Requisitos funcionales
  - Requisitos no funcionales

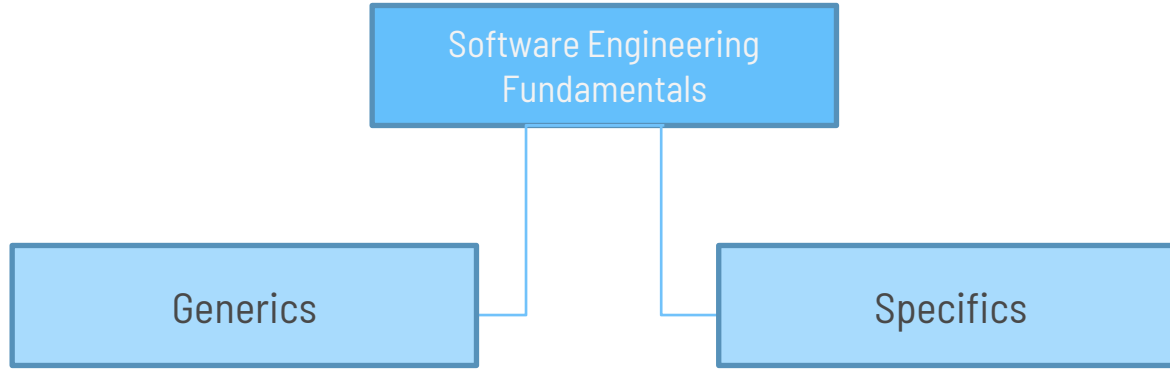

# Formats

Documents	Format
Item catalogue	Excel
Receipts and issues per item	Excel
Good receipt format	Excel
Good issue format	Excel
Stock list template	Excel

# Competencies

**Thanks!**

The image features a light blue, cloud-like shape in the center, containing the word "Thanks!" in a bold, dark gray sans-serif font. Surrounding this central element is a decorative network diagram. It consists of several blue circular nodes, each with a white center and a blue outer ring. These nodes are connected by thin gray lines. In the top right, a path of three nodes leads to a larger, more prominent node. In the bottom left, a path of four nodes leads to a larger, more prominent node. Ellipses (...) are used to indicate that the network continues beyond the visible nodes.
